## C. G. Buchholz Has a Close Call In Motor Accident

Truck Cuts in Ahead of Him  
And Throws Car in Ditch

While motoring to Medicine Hat last week-end, Mr. C. G. Buchholz and his son, Curtis, met with an accident which narrowly escaped being fatal.

When about a mile out of town a truck pulled out in front of the car and in passing made a quick cut in ahead of the car. In doing so the rear end of the truck caught the front end of the car, turning it into the ditch. The car turned over but fortunately both occupants were thrown clear of the wreck. Mr. Buchholz's car was badly damaged and from the look of it wonder is that some one was not killed. Beyond a few cuts and bruises and a bad shaking up both escaped without any serious wounds.

## Wool Scouring Plant Assured for Alberta

Plant is Not Yet  
Definitely Located

Representing a wool scouring plant, valued at \$500,000, capable of handling the bulk of Alberta's annual wool clip, is now assured for the province, according to authoritative information available in Edmonton. Just where the plant will be located is not yet decided. Four locations are being considered by the eastern firm handling the proposition, namely, Edmonton, Calgary, Lethbridge and Medicine Hat. One of the main considerations is proper railway facilities for both inward and outward shipments. The annual wool clip of the province runs between 8,500,000 and 4,000,000 lbs. The largest proportion is produced in Southern Alberta, but there are a number of important producing areas in the central and northern parts of the province. It is stated that the financial arrangements for the plant have now been completed, and the installation can be commenced as soon as a definite location is arranged. The proposition is being closely studied by the provincial trade commissioner's office at Edmonton.

## Airport Building To Be Torn Down

Proposed To Convert It Into  
A Dance Pavilion

Negotiations are now under way to have the Sunbeam Air building just east of town torn down.

Mr. Osborne, who purchased the building from the town some time ago, waited on the Edmonton city council "this week and asked permission to erect a dancing pavilion at a police point which is now being converted into a park. Mr. Osborne informed the Council that if permission were granted he would tear down the airport and use the material to put up an up-to-date pavilion on the site mentioned. A committee was appointed to go fully into the matter with Mr. Osborne.

Whether negotiations for the building go through or not we understand it is Mr. Osborne's intention to dismantle the building in the near future anyway.

## "Sadie McKee" Has Showmanship Essentials

It is the kind of story so-called moderns idol always seemed to best advantage. The flash showmanship is all in cash author, direct production credits, as well as theme value, that picks out the most commercially potent seems the most difficult.

The story by Vina Delmar of "Bad Girl", "Pick Up", "Woman Accused", serially in Liberty about the month ago.

Miss Crawford in "Fancied Love", "Today We Live", Esther Raleigh, Edward Arnold, Gene Raymond, Joan Dixon, Leo Carroll, Earl O'Connor and Cene Astin, with Candy and Coco as main entertainers.

Modernly timed with rapid-fire dialogue provoking equally fast action the story is both the romantic and dramatic career of Sadie McKee, a girl who arrives ambition for fame and love carried her from callow to prime with many amazing incidents.

Sadie McKee is the Monarch attraction Monday, Tuesday and Wednesday.

The committee in charge of the celebration to be held in Medicine Hat on Sept. 27, 28 and 29 offered a prize of \$50.00 to the one who could suggest the best name for the event. The judges awarded the prize to E. I. Stone of this paper. The name he suggested was "Medicine Hat's Annual Mardi Gras".

## Additional Locals

Mr. Raymond Dubau was a visitor at Elkwater Lake last Saturday.

Mr. R. S. Hodge was a business visitor at Burdett on Tuesday.

Mrs. T. Amahl returned on Sunday to town from her home near Bonnyville, Alta.

A section of the Imperial Veterans of Canada was formed in Medicine Hat this week.

Mrs. W. Wheeler returned on Sunday from a fortnight's vacation at Elkwater Lake.

Mr. and Mrs. John Mitchell and family and Mrs. Bassett, of Medicine Hat, spent yesterday in town with Mr. and Mrs. J. R. W. Camm.

The Misses Buchholz and Mary Broughton returned Saturday from Elkwater where they have been holidaying for a few weeks.

Mrs. Hodge (nee Miss Jean Gray) and small son Neville, of Vancouver, B. C. are visiting for a few days at the home of Mr. and Mrs. Harry Johnson.

Mr. and Mrs. F. Bailey and Mr. Peter Barr returned home last Friday from a motor trip to California. They report a most enjoyable outing.

Mr. and Mrs. W. Yates returned home last weekend after a pleasant holiday at Waterton Lake and other mountain resorts.

Mr. and Mrs. A. E. Shaw, accompanied by their two daughters Roberta and Melba, also Mr. and Mrs. W. Willis, attended to Tilley on Sunday. They dined at the home of Mrs. Shaw's brother, Mr. F. Mellen.

Mrs. D. C. Smith, of Powell River, B. C., formerly of Red Cliff, arrived in town last Sunday to visit her sister, Mrs. H. Neasey and Mr. Sheskey, who is accompanied by her daughter Kathleen and son Gordon.

A yield of 553 bushels of barley from 4.9 acres, an average of 72 bushels per acre, was reported from the Smith farm, just east of Lethbridge. The crop was grown from four bushels of Elite strain of Trebi barley and weighed 55 pounds a bushel.

A terrific wind storm struck town last Friday evening, but fortunately very little damage has been reported. The storm evidently was much worse both east and west of here as much damage was done around Calgary and through Saskatchewan where a million dollars damage was done.

Crops were badly damaged with wind and hail around Deerpont, Bottrell, High River, Nanton, Cayley, Champion and Vulcan.

ST. MARY'S CHURCH  
Celebration of Mass every Sunday of each month except first Sunday, at 9:30 a.m.

## Complete Summary of High School Results

The following students passed all units attempted during the term:

Robert Pow, Mildred Walton, Reggie Rose, Doris Wyatt, Douglas Lenang, Richard Rose Elmer Congram, Beth Paille, Ruth Pow, Emma Podesta, Marjorie Rutherford, Leslie Lepard, June Maillard, Jean Patterson, Lillian Lenning, J. I. Lowens, Sam Fulton, Florence Jacobson, Jim Brown, Helme, Alestad, Reva Garner.

The following students failed in only one subject:

Robert Buchholz, Keith Ellis, Mary Furber, Phyllis Chelton, Velma J. Trembath, Curtis Buchholz.

The following pupils failed in two units:

Jack Brydie, Susan Skidmore, Eleanor Learmonth and Mary Broughton.

The above summary includes results on the promotion tests conducted locally as well as the departmental examinations.

Completion of the Edmonton-Jasper Park Highway as an all-weather route, and the completion of the necessary reconstruction on the upper end of the Calgary Banff Park highway, were largely assured as a result of arrangements made with the federal government by Hon. Geo. Hoadley for a vote, totaling \$125,000 marked for the highway and \$150,000 marked for the train-Canada highway in Alberta. The latter provided for work both east and west of Calgary. In addition the federal government has granted a vote of \$100,000 monthly to Alberta for direct relief, which is somewhat larger than has been expected.

Some of the work on the two park highways will be done this season, but some of the construction work necessary, chiefly that on the Jasper road, will not be possible till next season.

## JUST FOR FUN

Monkeys in the zoo often go crazy from watching the actions of their audience. A few weeks in a rest house is required to bring them back to normal.—Life.

A man went into Cohen's bookstore and asked: "Have you a copy of 'Who's Who in What's What' by James K. Jerome?" Cohen replied: "No, Sir, but we got 'Who's He is' and 'He Got' by Bradstreet."

Madam Schumann-Heink the great opera singer, was sitting in front of an enormous steak. Curses passed her table, and seeing the huge portion of meat before the singer, he said: "Stena, you are not going to eat that alone!" Schumann-Heink said, shaking her fine old head, "No, not alone. With potatoes."

George Bernard Shaw, asked how he enjoyed the playing of a new young violinist, replied: "He reminds me of Paderewski." "Oh, but Mr. Shaw, Paderewski is not a violinist," said the prodigy's sponsor. "Just so, just so," was the response.

## Tennis Tournament Starts Here Tonight

Will be Played on Court at  
Gordon Memorial

Everything is shaping nicely for the tennis tournament which commences this week. The games will be played on Gordon Memorial Court.

There is already quite a list of entries among which are 11 for the men's singles, 12 for the ladies' singles, 3 for men's doubles, 6 for ladies' doubles and 1 for mixed doubles.

The draw is being made today and the first game will be played this evening.

Great interest is being shown in the tournament. As the evenings are now getting short it will take some time to complete the contests.

## "Ever Since Eve" Opens at Monarch

Was Turned Loose From Ca  
In Northwest Toronto

We have long awaited the opportunity to see George O'Brien in other than a western role. Now the wait is over or O'Brien makes his appearance as a man-about-town in a latest Fox Film release, "Ever Since Eve", which comes to the screen of the Monarch Theatre today. With his scintillas and spurs put aside O'Brien plays his city clothes and does some fast and fancy stepping in this film which is reported as being a laugh-provoking comedy-romance.

"Ever Since Eve" deals with a young man who is the foster-son of three old gold-miners, all confirmed women haters. The mine is in need of home re-arranging, and the young man volunteers to go east and purchase it.

His foster parents are loath to send him for fear he may fall into the clutches of a woman. It is finally decided that one of the men accompany him on the trip. East in order to keep an eye on him. Although he is closely guarded the young man falls victim to the charms of a roiling-digging debutante. They marry and he discovers that his wife has done it for his money. But he does not give her an opportunity to explain that she is also deep in love with him. He returns to the mine, only to receive a sour welcome from his foster parents. His bride, however, soon wins her way into the good graces of the partners and they learn of her unhappiness. The plan devised to bring the young man to his senses is heralded as one that will be the film to a hilarious success.

## BROOM CROPS IN NOW GROWING AT TABER

and wide-splitted conclusion. Satisfactory production of broom corn for use in the manufacture of brooms has been established on the irrigated section surrounding Taber, in southern Alberta this season. Some 400 acres have been grown under contract with a firm at Regina, which will utilize the material. The crop was recently inspected by officials of the consignment and found to be in excellent shape. Some of the crop stood as high as eight feet.

## New Greenhouse Is Being Erected On Third Street

By T. H. VanWert South of His  
Present Property

Work is now well underway on the erection of a new greenhouse for Redcliff.

The building is to be 50 by 18 feet and is being erected by T. H. VanWert south of his present building at the corner of Broadway and Third Street.

The greenhouse will be on a hollow tile foundation two and a half feet high and the upper portion will be glass.

It is Mr. Van Wert's intention to raise vegetables for this winter's season and later on to put in a crop of tomatoes and other.

## Kidnapped Brewer Released Last Friday

Was Turned Loose From Ca  
In Northwest Toronto

After sixty hours in the hands of his kidnappers, John Labatt, a wealthy brewer of London, Ont., was released last Friday night in northwest Toronto. The identity of the kidnappers is unknown to the police.

As this is the first kidnapping case in Canada, it has created Dominion wide interest and every effort is being made to capture the kidnappers.

It is not definitely known whether the Labatts paid over the full \$150,000 demanded by the kidnappers.

## ACREAGE IN WHEAT IS LOWER THIS YEAR

Tentative estimate of acreage in various grain crops in Alberta have been issued this week in company with those of other provinces, by the dominion bureau of statistics. The figures for Alberta are as follows: Wheat, 7,500,000 acres compared with 7,989,000 last year; oats, 2,870,000 acres; barley, 749,000; rye, 235,000 and flax 18,100.

## Redcliff Reminiscences

Taken From the Review File of  
Aug. 27th. —1915

Mr. Furber, of the Bowell district, was in town yesterday looking for harvest help. He said he expected to start cutting grain tomorrow.

Mr. Counselor R. S. Hodge who has been in training at Sarscoe camp, returned to Redcliff last Wednesday for a 30-day leave. Mr. Hodge accompanied him. Richard will put in a month in the harvest field.

Dr. J. C. Wray, who has been in Winnipeg for the past few weeks, has resumed work in the dental parlors on Third Street.

Redcliff's tax rate is 12 mills. That of Brooks is 35 mills.

The present prospect is that the average yield of wheat will be between 20 and 22 bushels per acre.

## ORANGE PEKOE BLEND

"Fresh from the Gardens"

## To Stimulate Objective Thinking

The foppy-turvy condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penury and want in the midst of a surplus of commodities? What are the real causes of stagnation of trade the world over. One hears that the capitalist system is doomed, and out of the present chaotic conditions a new order is bound to be established. Many theories are being continually advanced, designed to produce a new Utopia. The history of the world establishes the fact that all reforms necessarily come slowly. There can be no radical revolution in many parts of the world, and no social system. But the world does not stand still, a forward and not a backward movement is inevitable. The encouragement and not the suppression of constructive thinking and expression of thought would be of material assistance. In the annual address of Principal Pyke of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. It is reported in part as follows:

"In our academic seclusion we sometimes catch from a leader word the echoes of an accusation that the Universities of Canada are becoming 'nurseries of anarchy and revolution'. So far as such charges have any basis except hysteria, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The ideal of suppressing enquiry and free speech, which has for the moment established a tragic dominion in many parts of the world, is nowhere more absurd than in a University, where men and women gather to exercise their faculties of curiosity and logic. Those faculties in turn are necessarily impatient; their utterances are often crude and dogmatic. But dogmatism and utterance would be to a University the basest tresspass. As Penn said, 'Whoever is right, the persecutor must be wrong'."

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves—but not equally free. Properly regarded is no part of a teacher's proper function. He is not concerned to produce opinion, a temporary state of conviction which may be quickly changed by counter-propaganda; he is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he blinks his way into the outer world, where opinions clash unanchored both from fact and reason, it behooves him to remember what astonishing weight that world attaches to a professorial pronouncement. The dignity of the University stalks beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be; and the factors of wisdom not the least are self-restraint and kindness and patience."

## Appointment Commission

To Inquire Into Claims Of Alberta For Further Resources Cont-

penation  
Hon. Andrew Mc. Dymally, judge of the Manitoba court of King's bench; Hon. Thomas M. Twissell, judge of the supreme court of Alberta; and George C. Macdonald, Montreal, have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources. Announcement of the appointment was officially published recently. Mr. Justice Dymally is chairman.

With the exception of Mr. Justice Twissell the commission is the same as that which investigated similar claims on the part of Saskatchewan recently. On the completion of the Alberta report the commission will render to the federal government joint recommendations on behalf of both provinces.

## Chinese Form Of Torture

Tend Shin Of Rhinoceros To Crush Political Prisoners

The ancient Chinese had some strange uses for the rhinoceros, according to a report by an American archaeologist. One form of torture was to wrap a political prisoner in the hide of a freshly killed rhinoceros. As the hide dried it contracted and slowly crushed the victim. Another use of the rhinoceros hide was for rhinoceros skins was for making funeral cars. Also the horns of the bronze-age warriors was carved from rhinoceros horn.

Once upon a time the good died young. But since goodness became a virtually obsolete virtue, the careless have been dying young.

Cigarettes in their modern form were introduced into America and Europe about 60 years ago.

## Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 50 years. Proof enough that it is not a waste of time, but a sure and reliable remedy.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by T. S. Millers Co., Ltd., Toronto, Ont.

## Gold Pouring Into London

Great Increase In Foreign Deposits Of Precious Metal

The golden tide, uninterrupted in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold influx at the rate of \$25,000,000 weekly; then it increased early this year to \$40,000,000 weekly, and it averages 45 millions weekly and shows no indication of declining. As gold is mined in England from South Africa, Canada and other producing countries, it is bought by French, German, Dutch and American buyers, nervous about the financial state of affairs in their own countries, and stored away uselessly in the vaults of London banks, where they know it cannot be touched. Already in the square mile that constitutes the city of London more precious metal has accumulated than ever King Solomon's legendary mines contained. The latest figures, covering a period of nine months, show gold importations valued at \$1,000,000,000. Exports reached less than \$100,000,000. Altogether, at the moment one billion and a quarter of English gold is stored in the city banks—a figure which exceeds any other city in the world.

Bankers do not want this gold; they cannot use it either to provide funds for industry or work in the hands of the unemployed. Moreover, any fresh financial upheaval in Europe might cause its flight from London, with disastrous effects on the world's international stability. Its usefulness is further "emphasized by the fact that, although London's vaults are bursting with it, the official government figures reveal that the British people's purchasing power in the form of wages and salaries has been decreased through an economy campaign by \$310,000,000 since the gold crisis of 1933.

## Solo Climber Lost Life

Former British Army Captain Attempted Ascent Of Mount Everest

A solo climber of Mount Everest would be the limit in human daring. It is the sort of unfettered audacity which the Greeks thought allied to heroism and which the gods invariably bestowed. The penalty has been exacted. The British army captain who set out to walk up a mountain which organized expeditions have failed to conquer. It was his theory that the severe attempts had failed because over-ambition, in which he may have been right.

Mr. Wilson did not count on making a record of ropes and tracks and the Rutledge expedition last year, so that in the strictest sense his was something more than a one-man expedition. But when the expedition was over, he was obliged to leave the new school of mountaineering which was sprung up since the war and which has transformed a sport into a gamble with death. The new climbers have performed feats which the older Alps mountaineers would not attempt, but they have done it at an enormous cost of life.—New York Times.

## To Salvage Treasure

Norwegian Galeases Hunt In 1702 To Be Searched For Gold

The 19 galleons of the Franco-Spanish fleet sunk in the Bay of Vigo in September, 1705, by the combined British and Dutch fleets under Sir George Rooke and the Duke of Ormonde, will be searched for gold this summer, the Madrid newspaper El Debate reported.

Several previous attempts to salvage the treasure brought back nothing from the West Indies were fruitless.

## Glass In Latest Vogue

Glass and steel are the vogue for modern homes in England this time.

Glass what-nots and chrome-plated easy chairs are among the most popular pieces. Glass beds are coming into style. Steel drawing rooms and glass bedrooms are no longer the latest in human habitation.

The principal European countries, notably France, Italy, and Germany, have stringently controlled the import of dairy products during the past few years by tariff, quota, and other means. This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Canadian production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export surplus of alfalfa, green clover, and Canada hays grows are usually produced yearly.

## LIVE PLUG SMOKING TOBACCO

For real economy and enjoyment, smoke plug tobacco. The tobacco stays fresher, because you cut each pipeful as you need it—no cinders or flaky, in suit yourself. And, it lasts longer in your pipe!

## Building More Ships

Britain Still Maintaining Her Role Of The Sea

What may be taken as a sign of a world trend toward progress is the fact that on June 30 last, compared with the same date last year, there was a 70 per cent increase in the tonnage of the merchant ships under construction in the yards of all nations, except Russia, about which Lloyd's had no official information. Since June, 1933, there has been increased activity in shipbuilding and compared with the report on March 31, it is still on the up-grade though the August of new tonnage was only 1 per cent.

Great Britain and Ireland, which are taken together, still lead the way. The only nations to gain over the last quarter was that shown in their reports. They are building five of the ships of 20,000 tons or more, the eighth being under construction in France. Two of the large British ships were started last quarter.

The British yards are now building 48.3 per cent of all merchant tonnage, namely, 587,147 tons out of the 1,210,340 under construction. The British increase was 105,700 tons over last quarter. To appreciate Britain's position we have only to compare it with Japan's, which is next in line. Japan's total tonnage on June 30 was 197,280, less than a fourth of Britain's total, and Japan's increase was 14,000 tons, less than a seventh Britain's increase.

France comes next in line, then Germany, Denmark, Holland, Sweden, Italy, the United States and Spain, in the order named. The only two nations which showed less shipbuilding activity were Italy and Spain. The United States moved up from tenth to ninth place, though its increase was only 24,700 tons. It is said that British merchant shipping is maintaining its rule of the sea.

## A Million In Time

World War Lasted About Two Million Minutes

A new way of relating the meaning of a million is to think of what it means in time. Few people realize that there are less than a million days in the whole Christian Era; in fact, if you count back a million days from 1933, we came to a date well before the founding of Rome, while a million hours would take us back to the Battle of Trafalgar. The Great War lasted about two million minutes, and taking the total casualties as ten millions, this gives an average of five casualties per minute throughout the period of hostilities.

The movement of sheep and lambs in the winter is an important matter for Canadian farmers and stock raisers, and packers should be a substantial increase during 1933 and will well above the five-year average, 1928-1932.

Logging camps and other woods operations form an important feature for Canadian canned and dried fruits.

In 1933 a total of 398,300 acres were sown to buckwheat in Canada and production amounted to 8,483,300 bushels.

## For STIFFNESS

Many of Minsell's walls rubbed in every corner and edge. Made the walls seem very before you met.

34 You'll never timber up!

"KING OF PAIN" LINIMENT

Draught-proof curtains, brought together by a zipper tassel, have appeared in London.

Red raspberries are the hardest of the brambles.

## King George's Silver Jubilee

Celebration Will Be Held In May Of Next Year

The Irish Free State has declined to send a representative to participate in next year's celebration of the silver jubilee of King George's accession. It was revealed in the House of Commons.

The revelation was made by Acting-Premier Stanley Baldwin, who announced the celebration would be held May 6 to 18 and the 25th anniversary of accession would be observed as a public holiday throughout the nation.

Mr. Baldwin said prime ministers of Canada, Australia, New Zealand and South Africa had welcomed with warmth the suggestion they take part in the ceremonies at London, although it was impossible to tell at the moment if they would be able to be present owing to possibility of political developments keeping them at home.

The acting-premier said also the governor-general had to hold several conversations with the premiers regarding important empire questions, taking advantage of the invitation.

The Irish refusal of the presence was decided by President Eamon de Valera and his executive council. The grudging attendance was not possible under present conditions, a statement presumed to mean the Free State did not wish to take part in view of differences between it and the United Kingdom over land annuities and the consequent economic "war."

Feature of the celebration will be a thanksgiving service which their majesties will attend at St. Paul's cathedral and similar services in other parts of the country.

## Home For Quintuplets

New Home To Be Built In Little Northern Ontario Town

Somehow between now and when the early winter snow begins to fly, this little northern Ontario town, the Quintuplets, their five mothers and their parents will be housed in a comfortable modern residence.

The aid of the Canadian Red Cross, and with assistance also from officials of the northern Ontario relief commission, it was learned recently, plans will be far enough advanced in a few days to allow architect, contractor and workmen to be given their tasks in earnest.

## Has Given Good Service

Denver Man Still Driving Roadster Bought In 1910

C. C. Dill, a Denver roofing contractor, estimates that he has got 40,000 miles out of his 1908 roadster. He bought the machine in 1910, after it had been driven about 2,000 miles. The speedometer gave up and stopped at 246,000 miles. Since then he has been driving it steadily from coast to coast, and he has made Canada and the States. Now once it has been involved in an accident or brought its owner into difficulties with the law.

The Christian Science folk built a new publishing house in Boston during the years of depression, paid \$1,000,000 for it in cash and never had a golden party or a church service.

When a lion's tail becomes motionless, it is a sign that he is angry and about to attack, according to trainers.

Draught-proof curtains, brought together by a zipper tassel, have appeared in London.

Red raspberries are the hardest of the brambles.

## Secret Method Revealed

How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in Sessions Court in London during the trial recently of John C. O'Connor, charged with breaking into the Lady Margaret Day Nursery. Evidence against him was a thumb-print found on a clock, but O'Connor said he had only handled the timepiece in 1932. Detective-Sergeant Jack Livings of New Scotland Yard, said he had no doubt the fingerprint was that of O'Connor. He added: "The powder we apply to latent impressions to bring them out will stick to the ridges of a new print, but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by a duster, but a stale one can only be removed by a damp cloth."

## Education In Russia

Stalin Orders Secondary Schools To Raise Standards Again

Stalin's latest decree that the secondary schools of the Soviet Union must, some degree at least, return to the standards and methods of the rest of Europe adds another paragraph to a new and more hopeful chapter in an old and rather sorry story. The story is that of the failure of an experiment which like so many other things in modern Russia, looked very handsome on paper, but which has proved to be quite beyond realization in actual practice.—Glasgow Herald.

## Always Good Neighbors

Canada And United States Like To Exchange Courtesies

That is a friendly and less gesture when the Americans brought back the mice which they took away from the city of Upper Canada, returned back in 1917. To many, it may seem a little thing, yet it is just the sort of little thing that makes for understanding and good feeling between two countries. It is the sort of thing, indeed, which, occurring every now and then, has made Canada and the United States almost model neighbors.—Ottawa Journal.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

## "It Helps Me!"

That's what 98 out of 100 women say who are giving quivering nerves, gives them more energy, gives them more confidence, gives them more cheerfulness, gives them more life. It's called Lydia E. Pinkham's Vegetable Compound.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

In 1933 the speedometer gave up and stopped at 246,000 miles. Since then he has been driving it steadily from coast to coast, and he has made Canada and the States. Now once it has been involved in an accident or brought its owner into difficulties with the law.

The Christian Science folk built a new publishing house in Boston during the years of depression, paid \$1,000,000 for it in cash and never had a golden party or a church service.

When a lion's tail becomes motionless, it is a sign that he is angry and about to attack, according to trainers.

## WORLD HAPPENINGS BRIEFLY TOLD

Gordon W. MacDougall, K.C., was appointed a director of the Royal Bank of Canada. Announcement was made following the regular meeting of the board of directors.

Probate of the will of Alice Stephen, Baroness Northcote, shows the baroness left the bulk of her fortune of \$1,825,000 to assist migration to Australia of British children.

Lifting of the ban against competitive games in London parks on Sundays has been recommended by the parks committee of the London county council.

July was the driest month in at least 30 years in Quebec, according to records at McGill observatory. The total rainfall for the month was only 85.5 in. In July, 1914, the total fall was 97 in.

Rain, gushing at electric rates, are believed responsible for flames that broke out in the attic of the medical school of the University of Western Ontario, causing damage estimated to run into several thousands of dollars.

Three more governments have pledged themselves to place an embargo on war materials destined for the Bolivia-Paraguay war in the Chaco. It was announced at Geneva. The countries are Lithuania, Portugal and Uruguay.

Tenders for a fleet of 20 multi-engine flying boats to be used in the projected England-Canada air service have been submitted to Imperial Airways, according to the vice-president of The Daily Telegraph, who says the scheme is "well advanced."

Annual convention of the Manitoba Conservation Association will be held at Brandon, October 3. H. A. MacNeil, president, announced. Speakers will include Premier F. R. Bennett, who may, Mr. MacNeil said, inaugurate a Western speaking tour after the convention.

A resident of Winnipeg and a graduate of the University of Manitoba, Miss Kathleen Isabel Donnelly was awarded the Victoria Memorial Shaw Memorial fund scholarship for 1934-35 covering a course in the school for graduate nurses of McGill University.

The appointment of Lieut.-Col. E. H. Munro, former pension advocate of the veterans' bureau at Ottawa, as secretary of the new government branch set up under Col. J. T. Thompson to administer the Dominion Franchise Act, was announced. Col. Munro is a Toronto man.

## Recipes For This Week

(By Betty Barclay)

### RED HANDBERRY JAM

4 cups (2 lbs.) prepared fruit  
1/2 cup (3/4 lb.) sugar  
1/2 bottle fruit pectin.

To prepare fruit, crush or grind about two quarts fruit in a Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly while boiling. Boil hard 1 minute. Remove from fire and stir in fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent foaming. Pour quickly. Paraffin hot jam at once. Makes about 19 glasses (8 fluid ounces each).

### CHICKEN MEXALGO

1 young chicken  
1/2 cup butter  
1 finely chopped onion  
1 small carrot, cut in cubes  
1 turnip, cut in cubes  
1 cup canned tomatoes  
1 teaspoon sugar  
Salt and pepper.

Cut up a young chicken in quarters. Sprinkle with salt and pepper, dredge with flour and brown in oil. Put in a baking dish with the other ingredients and cook slowly in the oven until the chicken is tender. Serve in the dish in which it was cooked.

### Airport At Gréna Green

Meen For Elopement Couples Is Up-To-The-Gréna Green, Scotland's famous meen for elopement couples, has just opened an airport and is eagerly awaiting the arrival of the first pair to elope by air. Richard Henison, the blacksmith "priest," who has married 2,000 couples over the years, plans to hold an air pageant shortly. The first couple arriving by plane will be married free of charge and will be given a wedding present.

## Noted Horticulturist Dead

Ernest Hutchinson was Charter Member of B.C. Fruit Growers. Ernest Hutchinson, 81, who was the first horticulturist at the Ontario Agricultural College at Guelph, Ont., and who gave instruction in 1879 to Hon. W. R. Moberly, former Dominion minister of agriculture, is dead at Ladner, B.C., where he had resided 52 years.

Mr. Hutchinson resigned from the Guelph college in 1880. With the late Thomas McNeely, he set out probably the first commercial orchard in British Columbia.

He was one of the founders and charter members of the B.C. Fruit Growers' Association and was appointed the first fruit pest inspector in the province. In 1908, Western Australia applied to the B.C. government for a man to frame and enforce a fruit pest act for the state and Mr. Hutchinson was loaned. He remained on the government staff in Western Australia for 10 years.

## Started Big Plan

Originator Of Self-Defence Dies In England

John Carlton, oldest commissioner in the Salvation Army and chairman of the Army's assurance society, who died at a nursing home in Bromley at the age of 86, was the father of the self-defence work.

At a time of financial stringency, 46 years ago, General William Booth appealed to his officers for ideas. Carlton sent up a note offering to "go without pudding for a year and save 10 millions."

The general's imagination was captured by the suggestion. "We ought not to ask our people to go without pudding for a whole year," he said, "but I see no reason why we should not ask them to unite in going without something every day for a week." This year John Carlton's idea brought in nearly \$750,000.

By Ruth Rogers

The appointment of Lieut.-Col. E. H. Munro, former pension advocate of the veterans' bureau at Ottawa, as secretary of the new government branch set up under Col. J. T. Thompson to administer the Dominion Franchise Act, was announced. Col. Munro is a Toronto man.

## NAUTICAL THEME AFFECTS TENNY TOTS NEEDS AND ENDS THIS DRESS ADORABLE

It's no dream. The fusties fall softly from the shoulders through stitched plaits that are released from about the normal waistline. The collar is white dimity, so fresh looking and cool, printed in nautical blue ring motifs, is sketched. The collar is plain nautical blue dimity. The smart back closing is accented by white buttons. It may also be carried out in nautical blue plaid with plain white collar.

Other new suggestions for this smartly made model are striped or checked crinkled crepe (that needs no ironing), checked, seersucker, plaided gingham, pastel plaid, dotted or candy striped voile, pastel corded, etc.

Style No. 311 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 58-inch material with 1/2 yard of 36-inch material for collar. Price of pattern 20 cents in advance. Write for pattern preferred. Wrap coin carefully.

## LIVE AT HOME

By JACK MINER

There is no human power that can convince me that our loving God is to blame for this present crisis. The fact is for over four years we have allowed ourselves to go blood thirsty mad, right from the bar-room to the pulpit, and God does not send this world's affairs on November 11, 1918, for since that we have gone extravagantly crazy. Yes we have vast throngs of ten cent millionaires and have allowed ourselves to drift

Original poppy seeds. Yes, and a few sprouts from their lilac and snow-bell bushes, and a hundred and one plants and shrubs that I am absolutely sure will make your little home dearer to your heart. Now, don't let any landscape gardener or florist undo his services upon you, but plan it and plant it yourself. I tell you, a tree planted by your own hands can become a dear tree to you. My disinterested brother, try this plan and in less than five years you will

A view of Jack Miner's home from the Public Highway. Notice the towers planted by the side of the road.

away out and plunge head first into imaginary happenings, as someone has said, "Like a blind man in a dark room looking for a black cat that is not there."

Now, we are beginning to wake up and find we have been fishing on the wrong side of the boat. Yes, we begin to realize we have missed a golden opportunity and are dissatisfied with ourselves and everybody else, but here we are a thousand miles from home and nothing to show for it.

Now to those of you who have no home of your own, please let me advise you to try the "live-at-home"

be giving flowers to the other fellow. Personally, the little trifle I have been able to give away have brought me greater dividends than the few thousand dollars I have made in my brick and drain tile business.

Now I don't care who you are, for it is the thoughts you allow your heart to entertain that give you desires and cause you to act, and I know you can enjoy the sunrises in your own garden with a hoe in your hands, and even though you have to live in a tent for a season, you will enjoy it more and sleep sounder than when you are paying rent for four brick walls. And oh, what a blessed

Photo shows automobiles parked along the Public Highway in front of Jack Miner's home showing public change in the place.

change. In a few short years you will find yourself living in your own little planned and built cottage, perfectly surrounded with a little bit of heaven and the fragrance, kept up by the songs of a variety of birds, that come floating through upon your open window.

My dear friend, this is a dream, but it can be done and you can do it if you will cultivate the life of the mind. My gray hairs and scars of experience have compelled me to believe that a man can accomplish most anything he concentrates on. Let us all thank God that things are as well as they are with us and help ourselves by entertaining more "live-at-home" desires.

## More Accurate Than Physician's Forecast

French Scientist Says Spectroscope Foresees Approaching Deaths

The spectroscope, which records the birth and the decay of stars, can also forecast the approaching death of man.

A spectroscopic death curve, which forecast a human death more accurately than the physician, was described to the francophone Institute of Technology spectroscopic conference, which met in Cambridge, Mass., to discuss both practical and scientific uses of this instrument.

The report was made by P. and M. Leconte de Noy, of the Pasteur Institute, France. M. de Noy did not attend, but mailed his paper to Professor George R. Harrison, chairman of the conference.

The death curve was found in a spectroscopic examination of human and animal blood. Spectroscopic curves are like city skylines such as New York and London, which reveal wide architectural differences, which never would be mistaken for each other, and which an expert would never forget.

"The curves," M. de Noy's report states, "show remarkable constancy, whether man, horse or sheep serum is used."

"Alterations in the curves must correspond to very deep chemical modifications affecting the chromophore (color) elements which belong to very stable chemical groups."

"We predicted a man's death," which followed in 24 hours. He was partly paralyzed, owing to a malignant tumor of the spine, with metastases in the lower jaw, and urinary infection. He was expected to live, however, for many months."

M. de Noy does not say how sensitive a death barometer he finds this blood curve.

"Only important departures from the average," he states, "should be safely interpreted as an indication of pathologic disturbances. Such alterations are rare and seem to correspond to fatal cases."

## Saskatchewan Butler

June Outpour Of Creamery Butter Reached High Levels

The June outpour of creamery butter in Saskatchewan jumped to a new high mark of 3,745,315 pounds, exceeding the previous record month by almost 470,000 pounds. These figures were released recently by the bureau of publications. The greatest part of this increase was reported from the northern section of the province, where pastures continued to have been better than in the south.

Even the southern part of the province, however, shows a small increase. The north showed a percentage increase of 53.2 while the central section increase was 59.8.

## New Type Of Wool

Secret processes which make wool unshrinkable, remove the tickle, and add lustre are understood to have been perfected at the Wool Industries Research Association laboratories at Torridge, Leeds. For the present these processes are being revealed only to members of the association.

One of the most important influences in the volume of sheeps produced per hundred pounds of milk is the butter-fat content of the milk.

To protect its genuine animal industry, Germany has forbidden the use of the word amber in connection with all imitations.

## Little Journeys In Science

(By Gordon H. Gust, M.A.)

Water is the most familiar of all chemical compounds. It covers about three-fourths of the earth's surface, the greatest depth of the ocean being about six miles. It is an important component of the air, and even "dry" land contains considerable quantities of water. It constitutes about 65% of beef, 87% of milk, 92% of watermelons, and 95% of cucumbers. Thus, when we buy normal milk we pay for about 87% water.

Living things, both plants and animals, cannot exist without it. Enormous shipping, fishing, and other industries result from the fact that three quarters of the earth's surface consists of sea water, and in addition, there is a great volume of fresh river and lake water so necessary to human beings and other creatures not inhabiting the sea.

Rise in power is derived from water, and other mechanical power is obtained from falling water, as at Niagara where electricity is generated in a very large scale.

"Pure" water is odorless and tasteless. In this way it has no color that can be detected, but it has a bluish tint when observed through considerable thickness. When sufficiently cooled it solidifies to a colorless solid commonly known as ice. When heated it boils and changes rapidly into liquid water, commonly called steam.

There is a general law of nature that substance expands when heated and contracts when cooled. Fortunately for man and other living creatures water does not always follow this law. When warm water is cooled it contracts according to the law of expansion and contraction, until it reaches four degrees centigrade. For some reason which scientists cannot explain, from four degrees down as far as you wish to go water expands instead of contracting. Now, if it expanded it would be lighter than it was above four degrees, and hence the cold water will rise to the surface.

When the temperature drops to zero (or forms at the surface first, and then later after layer is formed from the surface down as the temperature remains below zero).

All would be different if water followed the law of expansion and contraction. The water would be heavier. The temperature approached zero and this heavy cold water would drop to the bottom of lakes or rivers. Ice would form first at the bottom and as the winter progressed the lakes would freeze from the bottom up, until it was converted into a solid mass of ice. All water animals would be destroyed and the warmth of summer would not be sufficient to thaw it out.

At noon, the temperature of the moon is hotter than boiling water, but it falls to several hundred degrees below zero at night.

Addition of a per centage of copper to pure gold gives it a reddish color; silver gives it a greenish tint.

The production of milk in the province of Quebec is more important than the production of beef.

The Canada thistle is not native to Canada. It was introduced originally from Europe.

Bakelite is an artificial coal-tar product used as a substitute for hard rubber, celluloid, or amber.

### Interesting Local Items

Miss Viva Cox was a visitor in town on Monday the guest of Mrs. Sanderson.

Mrs. R. C. Hargrave had a her guest last Saturday, Mrs. Jackson of Alderson.

Miss Norma McWaine spent a Thursday last in town the guest of Miss Selhorn.

Mrs. L. Varie of Vancouver is a present visitor with her parents, Mr. and Mrs. A. Shumlin.

Dr. J. C. Wray left on Monday on a motor trip to Portland. He accompanied his cousin, Dr. J. R. Paterson and his two sisters. They will be the guests of Dr. Paterson's brother, Mr. W. J. Paterson.

Mr. and Mrs. Ernest Needs of Drumheller, passed through town on Monday on their way from Drumheller, where they have been visiting Mrs. Wood, mother, Mrs. D. Black, formerly of Redcliff. While here, Mr. and Mrs. Needs were guests of Mr. and Mrs. R. C. Hargrave.

At the whist drive held in the parish hall on Monday evening Mrs. J. R. Cann and Mrs. Bainbridge had to cut the cards for ladies' first prize. Mrs. Bainbridge won the cut. Mrs. Fairhurst won the Gents' first. A strange coincidence was noted when it came to drawing the lucky tickets for the fancy work. It was found that he same two ladies were the successful ones. Mrs. Fairhurst having won first prize and Mrs. Bainbridge second. Congratulations to Mrs. H. Cox and Mr. A. R. Ballantyne.

H. Bortis has taken over the milk business previously run by J. Kilthau.

According to the new arrangements made with the Dominion government, Alberta will be paid \$100,000 monthly for direct relief.

A wedding of interest in town will take place on Saturday at St. Ambrose church when Miss Aisie Hill will become the bride of Mr. Tom Jones.

Mr. and Mrs. Allenback and family, accompanied by Miss Alice Hodges, left on Saturday for a two week's vacation at Keweenaw Lake.

Mr. R. Scanlan returned Saturday from the Medicine Hat hospital where he has been receiving treatment. He is now much improved.

During the high wind storm Friday evening, Mr. Guss, a local met with an accident as a result of which he had three cracked. It is now about to be around again.

Mr. Wm. Moran, of Calgary, accompanied by his two daughters, Mrs. Brooks of Taber, and Mrs. Elder, of Moose Jaw, spent the week with Mr. and Mrs. P. Avelle. Mrs. Brooks and Mr. Elder left for Taber on Sunday. Mr. Moran will spend another week in Redcliff.

Paul Knapper, Violinist and Teacher, re-opens his Studio on Saturday, Sep. 1st. Lessons will be taught from 7:30 a.m. to 1 p.m. Price \$1 for one hour lesson. Miss Tavis Knapper will also teach piano for 75 cents per lesson.

Applications for lessons may be made at the Post Office with Mr. C. T. Hall or Miss Terry Walker.

## "Old Timers"

THE EATON Fall and Winter Catalogue, that has just been delivered to its hundreds of thousands of readers throughout the West, marks the Fiftieth Anniversary of our entry into the business of selling by mail.

The first Catalogue, of course, was published in Toronto, and our first customers necessarily were from the East. But it was not long, surely, before the West—at that time still very much in the "frontier" stage of development—began to avail itself of the convenience of Mail Order buying, and the satisfaction of dealing with EATON'S. And it would be interesting to know who our earliest friends in the West were, and if they are still alive, well, and surprised that "It Pays to Buy from EATON'S."

The other day, for instance, we had a letter from a gentleman writing to a purchase he'd made by mail from EATON'S in 1884. The purchase was a pair of blankets which, incidentally, are still in service! This was 50 years ago, and a friend of 50 years' standing is a friend indeed. But there may be EATON customers in the West today who can recall dealing with us by mail even before that. And it would give us a real thrill to hear from them.

Do you know of any?
